Screen Protectors

Installation Instructions

Tips & Tricks: The display must be free of dust and dirt. The best installation results are achieved in a dust-free room, such as in the bathroom.

- Place the screen protector on your display prior to installation to find out the correct position for mounting the screen protector.
- If necessary, the screen protector can be mounted again: to do so, clean the adhesive layer with luke-warm water and a little detergent.

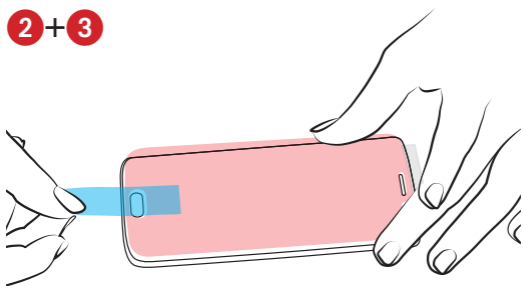

Tools (not included): cleaning cloth (e.g. microfibre cloth), credit card or similar, 2 strips of sticky tape (about 4 cm in length)

Clean the display

Thoroughly clean the display of your device with a suitable cloth until it is free of dust and dirt.

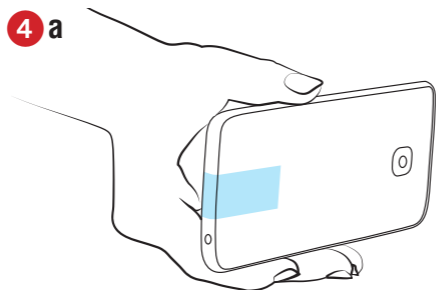

2 + 3

Attach the sticky tape

Attach one of the two strips of sticky tape to the bottom part of the screen protector. Line up the screen protector with the screen of your device.

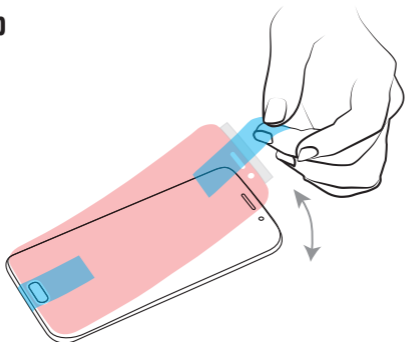

4 a

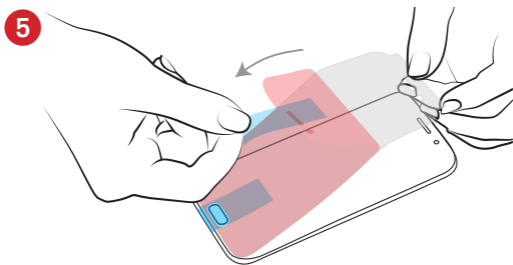

Fasten sticky tape to the device

Fix the screen protector by attaching the sticky tape to the back of your device.

4 b

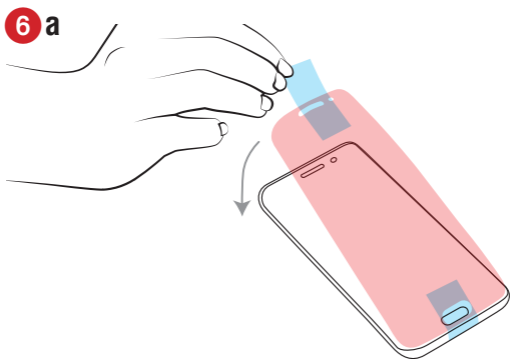

After fixing the second strip of sticky tape to the upper part, you can position the screen protector conveniently.

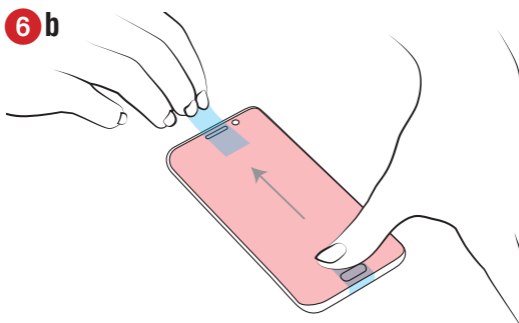

Remove backing film

Fold back the tab with the backing film and pull it off completely.

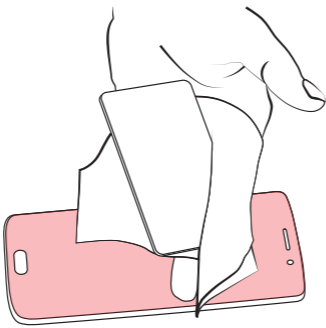

Perfectly align screen protector

Hold the free, upper side of the screen protector aligned perfectly to the screen...

and apply the protective film carefully.

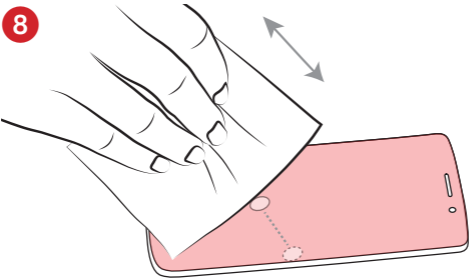

7

...and wipe smooth

Wipe the screen protector with a smooth, solid object (credit card wrapped in microfibre cloth, etc.) from the **BOTTOM** to the **TOP** of the display. After this you can remove the sticky tapes.

8

Remove bubbles

Any bubbles that may have formed can be wiped out to the sides using the credit card.

Done!

Important note: After a few days small bubbles disappear by themselves, provided they are not due to trapped dust.
